

DIGITAL Personal Workstation x86 to Alpha Enclosure Upgrade

EK-DPWSI-UP. A01

May, 1997

Dear Customer,

Congratulations on the purchase of your new DIGITAL Personal Workstation upgrade.

Follow the detailed instructions in the documentation which came with your system (EK-ALMIA-UI) to perform the following steps.

1. Backup all user applications and data; turn off and unplug your system.
2. Remove the keyboard, mouse, monitor, and any other external cables.
3. Remove all PCI options from your present system enclosure and reinstall them in the new one.
4. Remove all disk drives from your present system enclosure and reinstall them in the new one.
5. Install the keyboard, mouse, monitor, and any other external cables on the new system.
6. Power on the system and install Windows NT on the new system (look in the EK-ALMIA-UI index under *Windows NT* for instructions). Be sure to use Windows NT version 4.0 which was provided with the upgrade.
7. Return the chassis, CPU/riser cards, 32MB SIMM memory, CD-ROM, floppy drive, and power supply to DIGITAL. *Note: These items must be in functional working order to receive credit.*

Note: You may wish to obtain and install DIGITAL FX!32 to facilitate use of x86 applications.
