Psect synopsis output	6	00:00:00.03	00:00:00.11
Cross-reference output	0	00:00:00.00	00:00:00.00
Assembler run totals	1899	00:01:50.76	00:03:25.21

The working set limit was 2000 pages.
475517 bytes (929 pages) of virtual memory were used to buffer the intermediate code.
There were 70 pages of symbol table space allocated to hold 1240 non-local and 84 local symbols.
1783 source lines were read in Pass 1, producing 70 object records in Pass 2.
40 pages of virtual memory were used to define 33 macros.

Macro library statistics

Macro library name	Macros defined
_255DUA28:[BOOTS.OBJ]BOOTS.MLB;1	1
_255DUA28:[SYS.OBJ]LIB.MLB;1	5
_255DUA28:[SYSLIB]STARLET.MLB;2	13
TOTALS (all libraries)	19

1365 GETS were required to define 19 macros.

There were no errors, warnings or information messages.
