32 !  ABSTRACT:
33 !
34 !         *** SAMPLE MESSAGE FILE FOR TERMINAL/ECHO COMMAND ***
35 !
36 !         This file contains the message source for the SYSGEN
37 !         TERMINAL/ECHO command.
38 !
39 !         To change the terminal driver echo strings for:
40 !
41 !         ^C, ^O, ^Y, and ^Z, do the following:
42 !
43 !         1) Edit the messages below to include the text that you want
44 !            for a given echo.
45 !         2) To create the SYSGTTSTR.EXE file, issue the following DCL commands:
46 !
47 !         $ MESSAGE SYSGTTSTR
48 !         $ LINK SYSGTTSTR
49 !
50 !         3) Then, each time the system boots (in SYSTARTUP, for example):
51 !
52 !         $ SET MESSAGE SYSGTTSTR
53 !         $ RUN SYS$SYSTEM:SYSGEN
54 !         TERMINAL/ECHO
55 !
56 !         The command requires the SYSNAM and CMKRNL privileges.
```

```
57 !        The echos will now be re-loaded. This must be done at each boot.
58 !
