THE BUSINESS ACCOUNTING SYSTEM
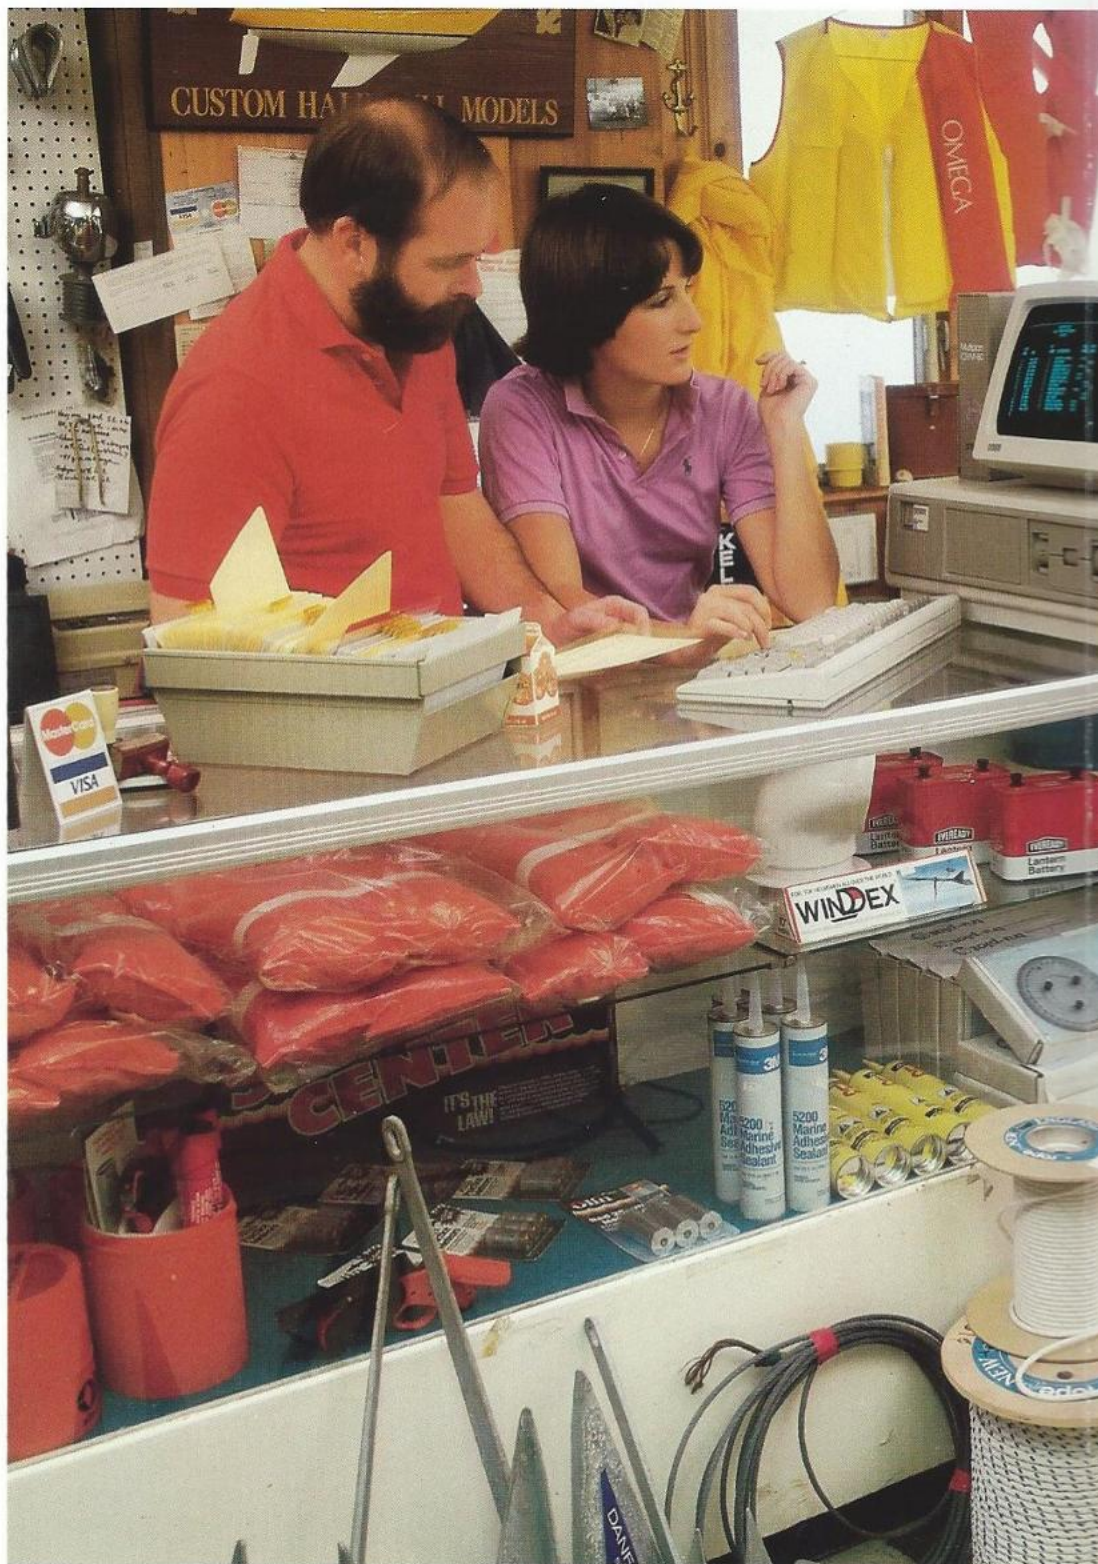

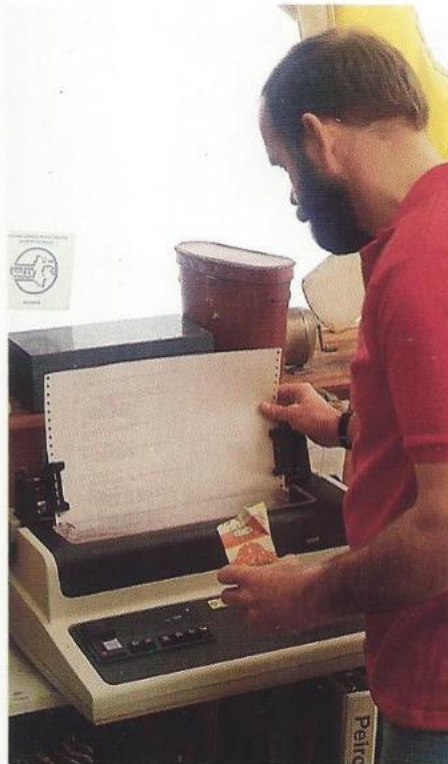

THE BUSINESS
ACCOUNTING SYSTEM

As the owner of your own company, you know that "entrepreneur" often means "doing everything yourself." From material management to monthly billings, from stocking shelves to signing checks, you are keenly aware of every procedure and every report, each demanding immediate disbursement of your most precious asset: your time. Time wasted is profit prevented. Neither has a place in your business.

By teaming a Digital office computer, Digital's Accounting Software, and your expertise, you can transform your business operations from a snarl of inefficiency to a network of success. Originally designed for minicomputer users, the Digital Accounting Software offers you, the microcomputer user, the time-proven control you require to maintain the profitability of your business. This full-function Business Accounting System offers you accounts payable and receivable, general accounting, inventory control, order processing, payroll, and sales analysis. All the

components of Digital's
Accounting Software are
certified as Digital
Classified Software, which
assures you of excellent
software performance and
full Digital support.

The Business Account-
ing System is designed with
room for growth, just like
your business is. By adding
a hard-disk drive, you
expand the capacity of your
existing system *instead* of
obsoleting it. Your invest-
ment in the Business
Accounting System will
continue to nourish your
company *and* your profits
long after you first install it.

WORKING AS PARTNERS FOR A TOTAL SOLUTION:

From the moment you first walk into the Digital Business Center you're aware of our dedication to just one end: giving you the computing solution that's best suited to your particular needs.

It starts with the Center's professional staff. People trained and experienced in selling Digital's broad line of desk-top and multi-user computers. These are the best engineered computers in the world because they meet all your present needs and can expand along with you as your business grows.

The Digital Business Center offers a full range of specialized small business applications solutions that incorporates many of the special requirements of your business. Because each Center is owned and operated by Digital, the world's second largest computer company, you can feel confident that your investment is fully protected with total support and service that is second to none.
