; 35          0035  1 !
; 36          0036  1 !       This module contains the entry points for the
; 37          0037  1 !       the portions of NML dealing with NICE V2 messages.
; 38          0038  1 !
; 39          0039  1 ! ENVIRONMENT:  VAX/VMS Operating System
; 40          0040  1 !
; 41          0041  1 ! AUTHOR:  Tim Halvorsen & Kathy Perko, October 1981
; 42          0042  1 !
; 43          0043  1 ! MODIFIED BY:
; 44          0044  1 !
; 45          0045  1 !       V03-004 MKP0008         Kathy Perko     2-Jan-1984
; 46          0046  1 !               Get rid of definition for NML$K_ENTBUFLEN since it's in
; 47          0047  1 !               NMLLIB now.
; 48          0048  1 !
; 49          0049  1 !       V03-003 MKP0007         Kathy Perko     29-June-1982
; 50          0050  1 !               Redo SHOW LINKS to use qualifier logic for WITH NODE commands.
; 51          0051  1 !               Rename some EIT fields.
; 52          0052  1 !
; 53          0053  1 !       V03-002 MKP0006         Kathy Perko     28-April-1982
; 54          0054  1 !               Delete start key and add second search key to NETACP
; 55          0055  1 !               QIO interface.
; 56          0056  1 !
; 57          0057  1 !       V03-001 MKP0005         Kathy Perko     17-Mar-1982
```

```
;    58          0058  1 !               Fix V2-V3 SHOW LINE so that it handles multidrop
;    59          0059  1 !               circuits.  I.E. it returns info for DMP-0.1, DMP-0.2, etc.
;    60          0060  1 !
;    61          0061  1 !       V02-004 MKP0004         Kathy Perko     1-Mar-1982
;    62          0062  1 !               Fix ZERO NODE from a V2 node.
;    63          0063  1 !
;    64          0064  1 !       V02-003 MKP0003         Kathy Perko     31-Jan-1982
;    65          0065  1 !               Fix NICE message so the line parameter, Receive Buffers
;    66          0066  1 !               is returned as a word.
;    67          0067  1 !
;    68          0068  1 !       V02-002 MKP0002         Kathy Perko     4-Jan-1982
;    69          0069  1 !               Add SHOW LINKS to V2 compatibility.
;    70          0070  1 !
;    71          0071  1 !       V02-001 MKP0001         Kathy Perko     29-Nov-1981
;    72          0072  1 !               Add zero counters to V2 compatibility.  Also, fix
;    73          0073  1 !               SHOW LINE SUMMARY and STATUS to return "on-starting"
;    74          0074  1 !               instead of "synchronizing" for state.
;    75          0075  1 !
;    76          0076  1 !--

1 %SBTTL 'NML_V2_DISPATCH  Dispatch to V2 show or set routine'
1 ROUTINE NML_V2_DISPATCH (ENT, RTN, INF, PRM1, PRM2, PRM3) : NOVALUE =
1
1 !++
1 ! FUNCTIONAL DESCRIPTION:
1 !
1 !       This routine is called when processing a show or set command
1 !       from a V2 system.  It dispatches to the appropriate V2 show or
1 !       set routine.
1 !
1 ! FORMAL PARAMETERS:
1 !
1 !       ENT             Entity type code.
1 !       RTN             Address of entity routine to be called.
1 !       INF             Information identity code (index).
1 !       PRM1            Routine parameter value.
1 !       PRM2            Routine parameter value.
1 !       PRM3            Routine parameter value.
1 !

1 GLOBAL ROUTINE NML$CHK_V2_STA=
1
1 !++
1 ! FUNCTIONAL DESCRIPTION:
1 !
1 !       This is an NPARSE action routine that is called when parsing a
1 !       SET LINE command from a V2 NCP, and a state change is found.
1 !       Set up the proper fields so the state change is made to both
1 !       the line and the circuit.  State is the only V2 parameter for
1 !       which this is done.
1 !
1 ! IMPLICIT INPUTS:
1 !       NPARSE_BLOCK (pointed to by AP) contains the parsed parameter data.
1 !       NPA$L_FLDPTR is a pointer to the parameter code in the received
1 !       message buffer.
1 !
1 !--
1
2 BEGIN
2
2 $NPA_ARGDEF;              ! Define NPARSE block reference.
2
2
2 !
2 ! Save the new state.
2 !
2 NML$L_STATE = .(.NPARSE_BLOCK [NPA$L_FLDPTR])<0,8>;
2 NML$GL_PRS_FLGS [NML$V_PRS_V2_STA] = 1; ! Set state change flag.
2 RETURN NML$_STS_SUC
