

Introduction

General

- TK50 Tape Drive -- What You Need To Know
- Intended Readers
- For Field Service Representative Only
- How to Use This Book
- Help
- Mnemonics

Chapter 1 Preparing for Installation

- Introduction.....1-1
- Preparing the Site.....1-1
- Unpacking the TK50-R (Rackmount) Subsystem.....1-1
- Preparing the Rack and Installing the TK50-R and Front Cover...1-4
- Unpacking the TK50-D (Desktop) Subsystem.....1-5
- Preparing the M7547 UNIBUS Controller Module.....1-6

Chapter 2 Installing in PDP-11 Systems

- Introduction.....2-1
- Specifications.....2-1
 - Installing M7547 Module in Computer Mounting Box.....2-2
 - Installing the M7547 UNIBUS Kit In PDP-11/44 Systems.....2-2
 - Installing the M7547 Cabling to Drive in PDP-11/44 Systems.....2-6
- Connecting a TK50-R or TK50-D to Host.....2-11
- Identifying Power Cable and Checking Voltage Switch.....2-12
- Connecting the Power Cord.....2-13
- Replacing the Rear Cover.....2-13
- Running the CZTKA Functional Diagnostic.....2-13
- Preparing Your Operating System.....2-14

Chapter 3 Installing in VAX Systems

- Introduction.....3-1
- Specifications.....3-2
- Installing M7547 UNIBUS Kit in VAX Systems.....3-2
- Installing FCC Cable Assembly in VAX Systems.....3-11
