This accessory occupies one slot of a system module mounting panel, allowing a FLIP CHIP module to be plugged in. The +10 v for the FLIP CHIP module is taken from pin A of the system module connector. The handle of a FLIP CHIP module plugged into the adapter projects 1½ in. beyond a standard System Module handle. Because components on the FLIP CHIP module project above the normal limit of components on system modules, some care should be taken to see that these components do not contact adjacent printed boards while power is applied.
