2848 DIAGNOSTIC - 360 PROGRAM FOR 2848 EMULATOR CHECKOUT

MAINDEC-11-DZDXL-A-D

The 2848 Diagnostic deck consists of a diagnostic monitor (DME) and a 2848 checkout program. This diagnostic is used in conjunction with the 2848 RESPONDER to check out the operation of the DX11-B hardware and 2848 ETAP software in the PDP-11, and is intended for use solely by Digital Equipment Corporation engineering personnel.

For a description of operation of the 2848 DIAGNOSTIC for DX11-B diagnostic purposes, see the DX11-B Maintenance Manual, DEC-11-HDXBA-A-D.

FRIEND - 360 PROGRAM FOR DX11-B CHECKOUT

MAINDEC-11-DZDXE-A-D

FRIEND is a stand-alone 360 program that generates arbitrary channel programs. It is used for checkout of DX11-B hardware and software in the PDP-11, and is intended for use solely by Digital Equipment Corporation Engineering personnel.

For a description of operation of FRIEND for DX11-B diagnostic purposes, see the DX11-B Maintenance Manual, DEC-11-HDXBA-A-D.
